Prof. A. Papapetropoulos:

National/Bilateral

“Non-radioactive nitric oxide synthase activity measurement: Development of a biosensor”. Greece-Turkey joint research and technology programs, Greek Secretariat of Research and Technology, 2010-2012 Principle Investigator

“H₂S: a new endogenous signaling molecule with protective actions in the cardiovascular system”, Greek Society for Cardiology, 2011-12, Principle Investigator

“Development of novel Angiogenesis-Modulating Pharmaceuticals by screening of natural compounds and synthetic analogues” Greek Secretariat of Research and Technology, 2010-2013, (Principle Investigator: Leandros Skaltsounis) Co-Investigator

“Hydrogen sulfide a new endogenous regulator of angiogenesis: signaling, physiology/pathophysiology and development of pharmacological inhibitors”. Greek Ministry of Education, 2012-2015, Principle Investigator

European Union

“Gasotransmitters: from basic science to therapeutic applications” European Science Foundation, COST 2011-2015, Chair
